

Become a Liquid Gas Europe Member

Your organisation is active in the LPG value chain? Let's work together!

Liquid Gas Europe represents the LPG sector at European level and counts among its members companies from across the industry, ranging from LPG distributors, national associations and equipment and services providers.

What we do

1. Advocate the interests of the LPG sector at EU level

The EU has never been more influential and energy policy has never been so important. Climate change, air pollution, and security of supply are among the policy areas that have a direct impact on the LPG industry. Liquid Gas Europe members are kept up to date with the latest regulatory developments and can contribute to the LPG's industry official positions through our working groups.

2. Promote the safe use, transport, and storage of LPG

Liquid Gas Europe works with authorities in Brussels and Geneva to ensure all technical and safety regulations are both workable and fit for purpose. Our members enjoy the opportunity to put forward their opinions on these regulations.

3. Share experiences in the LPG industry

Liquid Gas Europe is a hub for sharing knowledge and best practices among its members. "I heard that the EU legislation on oil stocks applies to my company. Is that right?" "How does the standard on cylinder labelling apply to composite cylinders?" "I would like to know more about initiatives to promote LPG for use in boats." For all these questions and more, we are here to help.

4. Develop standards that work for the industry

Liquid Gas Europe supports the CEN TC 286 Committee, so its members contribute to the development of standards that work for the European LPG industry. Our technical coordination group is one of the drivers behind the formulation of European standards.

The European LPG Congress and Exhibition

Meet European and Global LPG leaders, buyers and suppliers in Europe's biggest LPG conference and exhibition.

Liquid Gas Europe Members benefit from reduced rates, exclusive social events and a first choice on the selection of exhibition booths.
